

Factor89 is a control equity finance company operating in the lower-middle market. We partner with owners of companies who are looking to achieve outsized margin and EBITDA growth.

We have combined experienced investment managers in equity and debt with founders of an operational consulting firm which has created transformative value for their clients. We simplify the complex through governance and proven methodology.

Our targets are

An ideal target is a \$50 MM company with high gross margins, low operating profit and limited growth.

Company Type	Primarily manufacturing and distribution with complex products. Our methodology works across many industries and manufacturing and distribution is top of the stack.
--------------	--

Company Size	\$20-100 MM in revenue
--------------	------------------------

Company EBITDA	\$2-15 MM
----------------	-----------

Investor Base	We get our funding from friends and partner firms that have invested with us over the years.
---------------	--
